

*Introducing the washers and dryers
that conserve your resources.*

The New Eurotech Line.

Time. Money. Natural resources. Today's world demands maximum conservation.

In Europe, it's built into products from automobiles to zippers. And now, from one of Europe's largest appliance manufacturers comes a new line of conservation-minded washers and dryers. A line that provides the same money savings and energy and water efficiency Europeans have demanded for years. With sleek, sophisticated styling. Large capacity stainless steel tanks. Quiet operation. Plus the user-friendly controls you want. All without depleting the environment—or your pocketbook. Introducing the washers and dryers you have been waiting for: Eurotech.

Time.

Unlike many European front-loaders, Eurotech washers feature large stainless steel tanks so you can do bigger, and fewer, loads. Fast. The unique EuroStyle™ fabric care system uses no space-stealing central agitator so washers hold more: up to 16 full-size bath towels or three full sets of queen-size sheets. The system is gentler, and it cleans and dries better, too.

First, the Eurotech washer loosens the really tough stains with an optional cold-water soak cycle (EWF150) or Prewash cycle. Then, Eurotech can boost the wash water temperature up to a stain-dissolving 140° F — 20° higher than most top-loaders and even some front-loaders. And Eurotech washers spin-dry at speeds up to 1,200 rpm — twice as fast as top-loaders and faster than many front-loaders — extracting up to 50% more water. Finally, Eurotech dryers feature stainless steel drums, a SentryDry™ system with precise heat sensors, and an auto-reversing rotation to reduce wrinkles, potentially eliminating hours of ironing.

Earth and space.

Despite their large capacity, Eurotech units take up far less space than most. Smaller cabinets mean easy installation in closets, under counters — almost anywhere. And unlike top-loaders and even some other front-loaders, Eurotech units are stackable. There's even an ingenious combo model that washes and dries clothes in a single unit, runs on just 110V and occupies half the space of a regular laundry pair.

When evaluating washers, look at the suspension system. Select Eurotech washer models feature the Serenity Plus Load Management System,[™] offering heavy duty springs, a steel cradle and four steel shock absorbers. This system has provided smooth, quiet spinning in Europe for decades.

Crave peace and quiet? Eurotech's SilenTech[™] Noise Suppression System features a noise-absorbing DuraTech[™] triple-layer top, a Serenity[™] Plus Suspension System, a ribbed cabinet to further reduce vibrations, and rubber feet to insulate the unit from the floor. And noise isn't the only thing Eurotech spares you.

Running on as little as 212 kWh per year, a Eurotech washer also consumes up to one-third less electricity than other brands and half the water. And cleans so efficiently, you need only half the detergent — and no bleach. Making Eurotech as thrifty with the earth's resources as it is with yours.

Combo Washer & Dryer

Unit shown on an optional platform
that eases loading and unloading.

Money.

By now, it's clear—Eurotech washers and dryers won't take you to the cleaners. In addition to saving water, electricity, detergent and bleach, Eurotech also reduces wear and tear on your clothes. There's even an easy-access PumpSaver™ coin trap to help keep maintenance calls to a minimum. Best of all, Eurotech comes at a surprisingly low purchase price. Want more info?
